SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501-3520), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. "Collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the *Federal Register* concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the

information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

Record Retention Requirements for the Soy Protein and Risk of Coronary Heart Disease Health
Claim--21 CFR 101.82

OMB Control Number 0910-0428--Extension

Section 403(r)(3)(A) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 343(r)(3)(A)) provides for the use of food label statements characterizing a relationship of any nutrient of the type required to be in the label or labeling of the food to a disease or a health related condition only where that statement meets the requirements of the regulations issued by the Secretary of Health and Human Services to authorize the use of such a health claim. Section 101.82 (21 CFR 101.82) of our regulations authorizes a health claim for food labels about soy protein and the risk of coronary heart disease (CHD). Accordingly, FDA established the previously referenced information collection in support of the regulation. In the *Federal Register* of October 31, 2017 (82 FR 50324), we published a proposed rule to revoke the underlying regulation found at 21 CFR 101.82. We are taking this action based on our review of the totality of publicly available scientific evidence currently available and our tentative conclusion that such evidence does not support our previous determination that there is significant scientific agreement (SSA) among qualified experts for a health claim regarding the relationship between soy protein and reduced risk of coronary heart disease. Upon finalization of the proposed rule the associated information collection requirements under this OMB Control Number will be revoked. Until such time and in accordance with the PRA we retain our currently approved burden estimate for the information collection as follows:

Table 1.--Estimated Annual Recordkeeping Burden¹

21 CFR Section	No. of Record- keepers	No of records per Recordkeeping	Total Annual Records	Average Burden per Recordkeeping	Total Hours
-------------------	------------------------------	------------------------------------	-------------------------	--	----------------

101.82(c)(2)(ii)(B)	25	1	25	1	25
---------------------	----	---	----	---	----

¹There are no capital costs or operating and maintenance costs associated with this collection of information.

Based upon our current experience with the use of health claims, we estimate 25 firms market products bearing a soy protein/ coronary heart disease health claim and that perhaps one of each firm's products might contain non-soy sources of protein along with soy protein. The records currently required to be retained under § 101.82(c)(2)(ii)(B) are the records, e.g., the formulation or recipe, that a manufacturer has and maintains as a normal course of its doing business. Thus, the burden to the food manufacturer is limited to assembling and retaining the records, which we estimate will take 1 hour annually.

Dated: February 28, 2018.

Leslie Kux,

Associate Commissioner for Policy.
